

MEMORANDUM

CITY OF TUALATIN

TO: Tualatin Parks Advisory Members

FROM: Alice Cannon, Assistant City Manager
Dayna Webb, Project Engineer

DATE: December 9, 2014

SUBJECT: City of Tualatin's 2016-2020 Capital Improvement Plan

ISSUES BEFORE TPARK:

Review and feedback on the City's Capital Improvement Plan.

EXECUTIVE SUMMARY:

The City of Tualatin's Capital Improvement Plan (CIP) establishes, prioritizes, and ensures funding for projects to improve existing and develop new infrastructure and facilities. The use of a CIP promotes better use of the City's limited financial resources, reduces costs, and assists in the coordination of public and private development.

There are five different project categories in the City's CIP:

1. Facilities/Equipment
2. Parks and Recreation
3. Technology
4. Transportation
5. Utilities

The projects are proposed to address Master Plan priorities, regulations, maintenance, and repair needs, health and safety and coordination opportunities. Once they are proposed they are then prioritized using the same criteria with a review of available resources to complete the proposed projects.

There are three major sources of funding for Capital projects. They include:

1. **System Development Charges** – these are paid by developers in order to provide additional capacity to the City's infrastructure.
2. **Utility & Gas Tax Funds** – these are paid by the ratepayers in Tualatin and are generally used for maintenance and repair of the existing public utility and transportation system.
3. **General Funds** – this comes from franchise fees and property taxes and pays for other needs – parks, etc.

MEMORANDUM: 2016-2020 Capital Improvement Plan

December 9, 2014

Page 2

A map and project summaries are available which show the proposed Capital Improvement Plan projects. The map includes water, storm water, wastewater, and transportation projects that are projected over the next 5 years.

City staff is attending all of the citizen advisory committees as one of the public outreach efforts prior to the City Council's review and acceptance of the plan. The City Council will consider acceptance of the proposed CIP on January 26, 2015. The CIP will then be used as a planning tool in the annual budget process in May and June, 2015.

City of Tualatin

Capital Improvement Plan

2016-2020

The City of Tualatin's Capital Improvement Plan establishes, prioritizes, and ensures funding for projects to improve existing and develop new infrastructure and facilities.

The use of a CIP promotes better use of the City's limited financial resources, reduces costs and assists in the coordination of public and private development. In addition, the planning process is valuable as a means of coordinating development of facilities and infrastructure.

City of Tualatin
18880 SW Martinazzi Ave
Tualatin, OR 97062
www.tualatinoregon.gov

DEFINITION

The CIP will include those items in excess of \$10,000 with an expected useful life of more than one year.

Smaller projects (less than \$10,000) may be combined into one project and therefore defined as a capital expense.

Items such as minor equipment and routine expenses will continue to be accounted for in the City's annual budget and will not be included in the capital improvement plan.

CRITERIA

The CIP Review Team conducts an internal project ranking process to prioritize projects to be included in the following fiscal year's annual budget.

The criteria used in this ranking includes, but are not limited to:

- Addresses health and safety concerns
- Implements a Master Plan
- Support of Council goals
- Meets a regulatory or mandated requirement
- Considers service delivery needs
- Includes outside funding and partnerships

CATEGORIES

FACILITIES & EQUIPMENT

Projects involving buildings, structures, equipment, and vehicles that the City owns and manages.

PARKS & RECREATION

Projects affecting parks and open spaces

TECHNOLOGY

Projects involving hardware, software, or infrastructure that improves and/or support technology.

TRANSPORTATION

Projects affecting transportation (streets, bike lanes, pedestrian crossings, paths, trails, and rail).

UTILITIES

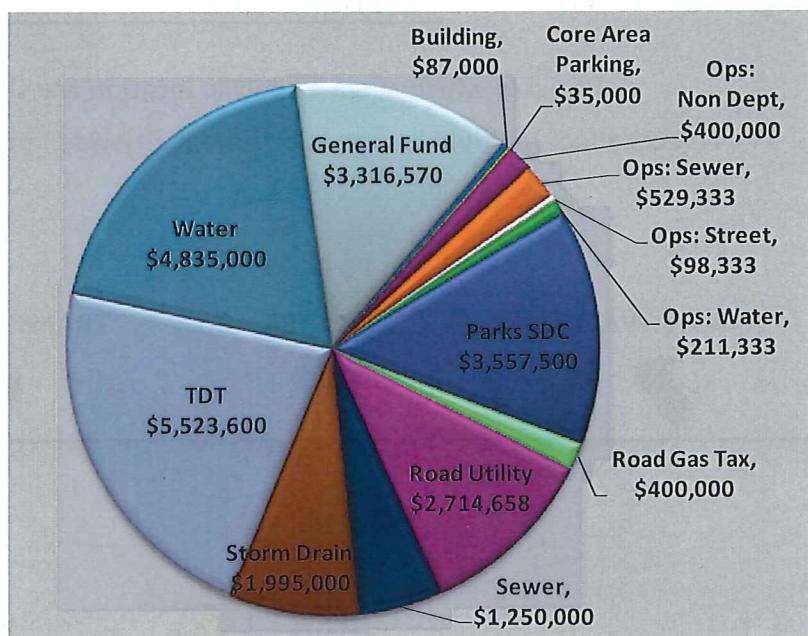

Projects involving the Water, Storm, and Sewer distribution infrastructure.

FUNDING

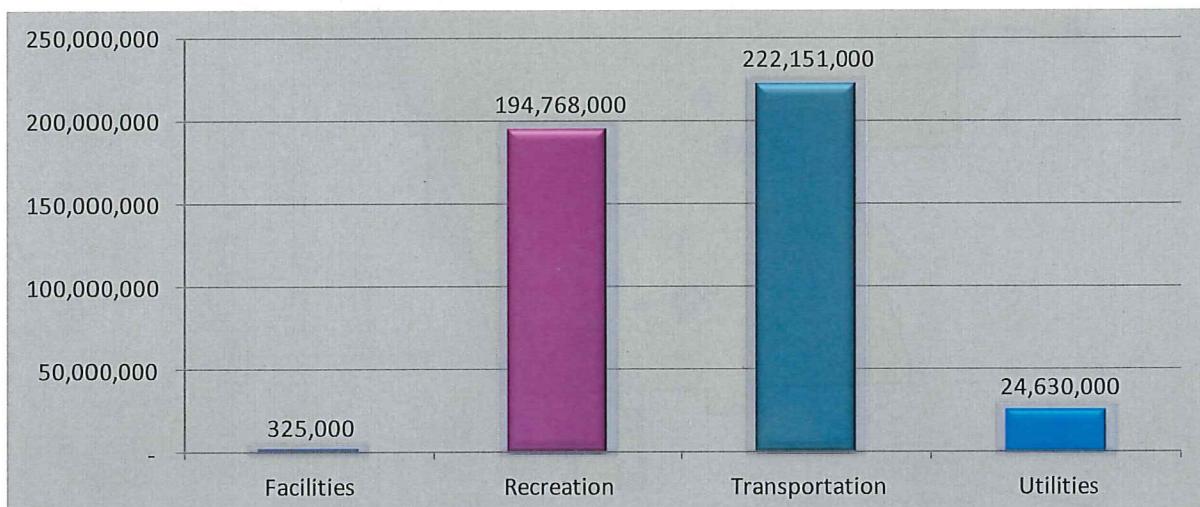

The nature and amount of the project generally determine financing options as do projected revenue resources. The following financing instruments could be used:

- Outside funding: grants, federal, state, and county funds and donations
- Development fees
- Gas tax revenues
- Utility fund revenues
- General fund revenues
- Debt secured by a restricted revenue source
- General obligation debt

UNFUNDED PROJECTS

Typically there are more project requests than can be funded in the five-year CIP period. These projects are listed in the appendix as unfunded projects. Projects are added to the unfunded list as they are identified through master planning efforts, public involvement activities, new regulations, and system development reviews. Each year, based on ranking criteria and available funding, departments review the unfunded list to determine which projects can be moved from an unfunded status into the appropriate category as a proposed to be funded project.

PROJECT IDENTIFICATION MAP

Projects which affect a specific location are shown in the map below.

Projects affect multiple locations or have a citywide impact are not reflected on the map.
