Tualatin

geographic name Tu·a·la·tin | tü-'ä-lə-ten : city NW Oregon. A nice place to live, work, and play. Pop 26,590

River

noun | riv er | \'ri-vər\ : a large natural flow of water that crosses an area of land and goes into an ocean, a lake, etc. The 80-mile-long Tualatin River meanders slowly from the Coast Range to the Willamette River.

Greenway

CITY OF TUALATIN

noun|green.way| \'grēn-'wā\

a corridor of undeveloped land to preserve the scenic value of the Tualatin River, enhance water and air quality, provide fish and wildlife habitat, and enable recreational and commuter use from Tualatin's western to eastern boundary.

The Tualatin River **Greenway Trail** is a ³/₄

mile long bicycle and pedestrian facility that promotes active, healthy living while connecting people with nature. The trail meanders through stately trees, provides beautiful views of the Tualatin River, skirts the edge of a bird-filled wetland, and crosses under Interstate 5. The trail provides a safe bike and pedestrian alternative to driving while improving connectivity between residential and commercial areas with public facilities, such as parks and the library. The trail promotes safety by enabling a safe and interesting alternative to crossing over Interstate 5 at the Nyberg Street bridge.

The trail fills a gap in a 4.7 mile segment of the Tualatin River Greenway that is located on the north and south sides of the Tualatin River while running through the cities of Tualatin, Durham, and Tigard. The trail connects four major parks and crosses the Tualatin River at the Ki-a-Kuts Bicycle and Pedestrian Bridge at the north end of Tualatin Community Park. New wayfinding signs guide people to and along the trail.

Nature conservation is an important benefit of this project. More than two acres along the south bank of the Tualatin River have had invasive non-native

plant species removed and were replanted with trees and shrubs to improve water quality, fish and wildlife habitat, soil conservation. air quality, and natural beauty.

The Tualatin City Council named a peaceful, tree-lined overlook along the trail at the edge of the Tualatin River after Yvonne Addington in honor of her contributions to the

mission and purposes of parks and recreation in the City of Tualatin. Yvonne served as Tualatin's first City Administrator between 1969 and 1982 and continues to serve through her passionate and effective volunteerism with the City of Tualatin, Tualatin Historical Society, and other public and private organizations.

Educational interpretive elements along the path enable people to experience a walk through geologic time while discovering, exploring, and learning about the last Ice Age Missoula Floods, Pleistocene megafauna of the Willamette and Tualatin valleys, the emergence of Paleo-Indians, transportation improvements of early settlers, and how land uses transform over time.

This trail project has received an Excellence in Sustainability Award for Green Infrastructure from the American Planning Association in April 2016.

- The new trail segment is ¾ of a mile long The boardwalk decking is made out • Each step between Barngrover Way and
 - of 100% recycled plastic
 - I-5 represents 25 years in geologic time The boardwalk decking has 67,602 screws

- The trail features 5 overlooks and 9 benches
- The trail features 2+ acres of nature conservation with 3,765 trees and shrubs
