Interpretive Elements

Tualatin River Greenway Trail Interpretive Overview

before you take another step...

The content of the signs has been reviewed and approved by the Tualatin River Greenway Trail Authority. The signs will be installed along the trail and will be visible to the public. The signs will be installed in a way that is safe and secure for the public.

What you should know:

- The signs will be installed in a way that is safe and secure for the public.
- The signs will be visible to the public.
- The signs will be installed in a way that is safe and secure for the public.

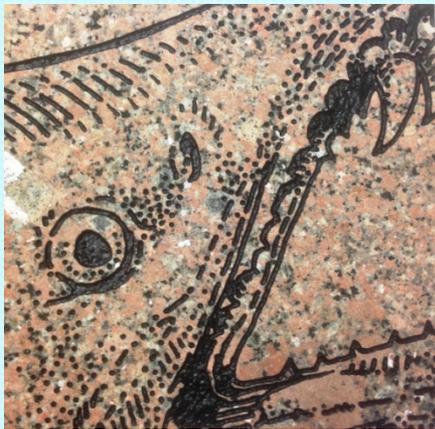

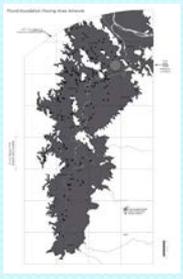

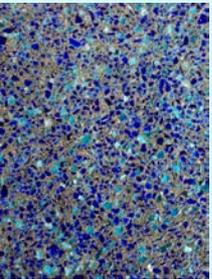

discover the ice age trail

Imagine thousands of years ago, a massive glacier covered the entire region. The glacier melted, and the water formed the Tualatin River. The glacier left behind a trail of ice age artifacts, including tools, bones, and footprints. The trail is now a part of the Tualatin River Greenway Trail.

The trail is 10.5 miles long and follows the Tualatin River. The trail is a mix of paved and unpaved paths. The trail is suitable for walking, jogging, and cycling. The trail is a great way to learn about the ice age and the Tualatin River.

Things to look for along the path:

- Ice age artifacts, including tools, bones, and footprints.
- The Tualatin River, which was formed by the melting glacier.
- The Tualatin River Greenway Trail, which follows the river.
