### EROSION / SEDIMENTATION CONTROL (ESC) MEASURES

#### Minimum ESC Requirement During Construction:

- ☐ Sedimentation Facilities
- ☐ Stabilized Construction Entrance
- ☐ Perimeter Runoff Control
- ☐ Clearing & Grading Restrictions
- ☐ Cover Practices
- ☐ Construction Sequence
- ☐ Other: \_\_\_\_\_

#### Minimum Requirements Following Construction:

- ☐ Stabilize Exposed Surface
- ☐ Remove & Restore Temporary ESC Facilities
- ☐ Clean & Remove All Silt & Debris
- ☐ Ensure Operation of Permanent Facilities
- ☐ Other: \_\_\_\_\_

This plan for erosion control was prepared and submitted in accordance with Clean Water Services' Design and Construction Standards. This erosion control plan has construction notes complete: including, but not limited to, emergency phone number, phasing schedule, current details, and staging for installation and removal of erosion control measures.

I have read and will comply with the above and will construct and maintain ESC measures as necessary to contain sediment on the construction site. I understand that failure to comply is a violation of Tualatin Municipal Code Chapter 3-5.
