## City of Tualatin

www.ci.tualatin.or.us

December 28, 2007

Honorable Mayor, Members of the Council, and Citizens of the City of Tualatin:

State law requires that all general-purpose local governments publish within six months of the close of each fiscal year a complete set of financial statements, presented in conformity with generally accepted accounting principles (GAAP) and audited in accordance with generally accepted auditing standards by a firm of licensed certified public accountants. Pursuant to that requirement, we hereby issue the comprehensive annual financial report of the City of Tualatin for the fiscal year ended June 30, 2007.

Management assumes full responsibility for the completeness and reliability of all of the information presented in this report. To provide a reasonable basis for making these representations, management of the City of Tualatin has established a comprehensive internal control framework that is designed both to protect the City's assets from loss, theft, or misuse and to compile sufficient reliable information for the preparation of the City of Tualatin's financial statements in conformity with GAAP. Because the cost of internal controls should not outweigh their benefits, the City of Tualatin's comprehensive framework of internal controls has been designed to provide reasonable rather than absolute assurance that the financial statements will be free from material misstatement. As management, we assert that, to the best of our knowledge and belief, this financial report is complete and reliable in all material respects.

Grove, Mueller, & Swank, P.C., a firm of licensed certified public accounts, has audited the City of Tualatin's financial statements. The goal of the independent audit was to provide reasonable assurance that the financial statements of the City of Tualatin for the year ended June 30, 2007, are free of material misstatement. The independent audit involved examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. The independent auditors concluded, based upon the audit, that there was a reasonable basis for rendering an unqualified opinion that the City of Tualatin's financial statements for the fiscal year ended June 30, 2007, are fairly presented in conformity with GAAP. The independent auditor's report is presented as the first component of the financial section of this report.

Management's discussion and analysis (MD&A) immediately follows the independent auditor's report and provides a narrative introduction, overview, and analysis of the basic financial statements. The MD&A complements this letter of transmittal and should be read in conjunction with it.

#### Profile of the City of Tualatin

The City of Tualatin, incorporated in 1913, is located in Northwestern Oregon in the Portland metropolitan area, in the counties of Washington and Clackamas, just twelve minutes south of Portland's city center. The City of Tualatin currently occupies a land area of 7.9 square miles and serves a population of 25,650. The City of Tualatin is empowered to levy a property tax on both real and personal properties located within its boundaries. It also is empowered by state statute to extend its corporate limits by annexation, which occurs periodically when deemed appropriate by the City Council.

The City's population is estimated at 25,650 for 2006-07 and is expected to increase to 26,035 as of July 1, 2008, and will increase approximately 1.5% per year to 2014.

The population's median age is younger than the Oregon median age (31.9 years compared to 36.3 years) and includes many young families with children. As the population ages, it is expected that the senior population will increase greatly in the future.

Tualatin has experienced a large growth in Hispanic residents since 1990. The percentage of Hispanics living in the City (11.9%) now exceeds the state average of 8%. The median household income in Tualatin (\$55,762) is higher than that of Washington County (\$52,122) or of the State of Oregon (\$40,916) at the 2000 Census. Tualatin has a lower percentage of families living below the poverty level than does either Washington County or the State of Oregon at 4.6%.

The City of Tualatin operates under the council-manager form of government. Policy-making and legislative authority are vested in a City Council consisting of the mayor and six other members. The City Council is responsible, among other things, for passing ordinances, adopting the budget, appointing committees, and hiring the City's manager. The City's manager is responsible for carrying out the policies and ordinances of the City Council, for overseeing the day-to-day operations of the City and for appointing the heads of the various departments. The Council is elected on a non-partisan basis. Council members serve four-year staggered terms, with three Council members elected every two years. The Mayor is elected to serve a four-year term.

The City of Tualatin provides a full range of services including: police protection, community planning and building inspection, engineering and economic development, the construction and maintenance of highways, streets and other infrastructure, community library services, recreational activities and cultural events.

The annual budget serves as the foundation for the City of Tualatin's financial planning and control. All department heads of the City of Tualatin are required to submit requests for appropriation to the City Manager (who acts as the City Budget Officer). These requests are the starting point for developing a proposed budget. After the Budget Officer prepares the proposed budget, notice of the first budget committee meeting is published. The budget committee (consisting of the City Council and an equal number of appointed members) reviews and approves the budget after which notice of the public hearing for the City Council to adopt the budget is published. The budget must be adopted making appropriations for the ensuing fiscal year (July 1 to June 30) by June 30<sup>th</sup> (of the previous year). Transfer of appropriations between departments requires the special approval of the City Council.

Budget-to-actual comparisons are provided in this report for each individual governmental fund for which an appropriated annual budget has been adopted. For the General fund and Park Development fund this comparison is presented as part of the basic financial statements for the governmental funds. For governmental funds with appropriated annual budgets (other than the General fund and Park Development fund), this comparison is presented as other supplementary information.

#### Factors Affecting Financial Condition

Factors which may be important in affecting financial conditions in the future for the City include the following:

The City has had vigorous high quality development for several years which has raised assessed value and provided a growing tax base for general operations. With the City's low permanent tax rate for operations, any future drop in new development may make it necessary to find new revenue sources to maintain and increase services. This is particularly important, given the state's limitation on annual increases in assessed value to 3%, unless the property is substantially improved, rezoned, subdivided, or annexed.

The City sold library bonds of \$4,225,000 on November 7, 2007 in response to community support for increased capacity to provide library services. The City started the physical expansion from 8,500 to 20,000 square feet in April 2007. The library is temporarily relocated in a nearby location on Nyberg Street in Tualatin during construction.

An addition to the City Offices to relieve overcrowding in the Building Division was bundled with the library expansion project to coordinate design in overlapping areas and to take advantage of design and construction efficiencies. Funding for the renovation of the City Offices building was approved by City Council through a Supplemental Budget in December 2006. The increased operating costs will be absorbed by the General Fund revenues that have increased since 2004. Capital costs will be paid with the 2004 bond authorization and a share of the Central Urban Renewal District Project Fund resources.

Traffic demands in the southwestern portion of the greater Portland area have grown substantially, leading to increasingly congested conditions. Increased traffic comes from more people living and working in Tigard, Tualatin, Sherwood and Wilsonville, and moving freight into and out of the area. Growth throughout the region has statewide significance, further confirming its importance.

The Oregon Constitution reserves to the people of the State the right to initiate the power to amend the State Constitution or place measures on the statewide general election ballot. Once an initiative measure has gathered a sufficient number of signatures and qualifies for placement on the ballot, the State is required to prepare a formal estimate of the measure's financial impact. Such initiatives are sometimes declared unconstitutional; however, they have potential for major economic impact for cities and counties in Oregon.

#### Cash Management Policies and Practices

During the year, cash not required for current operations is invested in the Local Government Investment Pool and in investments outside the pool (as limited by Oregon law) such as U.S. Treasury securities, Federal Agency securities, high-grade commercial paper, and Bankers' Acceptances.

The criteria used by the City to select investments are safety, liquidity, and return on investment. The State Pool provides liquidity, however, the City also invests funds outside the Pool. Pension trust funds and deferred compensation funds are invested by the agents with whom they are deposited and are not included in the City's investment activity.

#### Risk Management

The City participates in a worker's compensation self insurance pool along with more than 250 other cities and counties in Oregon. The pool is administered by the City/County Insurance Services Trust (CCIS). The City has a comprehensive safety training policy that emphasizes risk control. Tualatin also participates in a property/liability pool administrated by CCIS. Approximately eighty percent of Oregon cities and one half of Oregon counties are served by CCIS in this capacity.

#### Pension and Other Post-employment Benefits

The City provides a retirement plan for each permanent employee group including police personnel, management and the municipal employee's bargaining unit group. The Oregon Public Employees Retirement System (OPERS) is a cost-sharing multiple-employer defined benefit plan. OPERS is the primary agent for the City's employees' pension plan. Prior to the year 2000, most non-management, non-police personnel were part of another pension plan, but were at that time given the opportunity to join the OPERS Plan. The City paid for the conversion as determined by the OPERS actuary and substantially all employees transferred to this plan.

#### Awards and Acknowledgements

The Government Finance Officers Association awarded a Certificate of Achievement for Excellence in Financial Reporting to the City of Tualatin for its comprehensive annual financial report (CAFR) for the fiscal year ended June 30, 2006. This was the 15th consecutive year that the City has received this prestigious award. In order to be awarded a Certificate of Achievement, the City published an easily readable and efficiently organized CAFR. This report satisfied both the GAAP and applicable legal requirements.

A Certificate of Achievement is valid for a period of one year only. We believe that our current CAFR continues to meet the Certificate of Achievement Program's requirements and we are submitting it to the GFOA to determine its eligibility for another certificate.

We would like to express our appreciation to members of other departments who assisted with contributions of information to be included in this report. Credit must also be given to the City Mayor and the City Council for their unfailing support for maintaining the highest standards of professionalism in management of the City of Tualatin's and the Tualatin Development Commission's finances.

The preparation of this report would not have been possible without the dedicated hard work of the Finance Department Staff. A special note of appreciation is given to our auditors, Tom Glogau, Charles Swank, and Greg Ficek.

Respectfully submitted,

Sherilyn Lombos

City Manager

Dan Boss

Interim Finance Director

Sapphire Chen

Accounting Supervisor

## Certificate of Achievement for Excellence in Financial Reporting

Presented to

## City of Tualatin Oregon

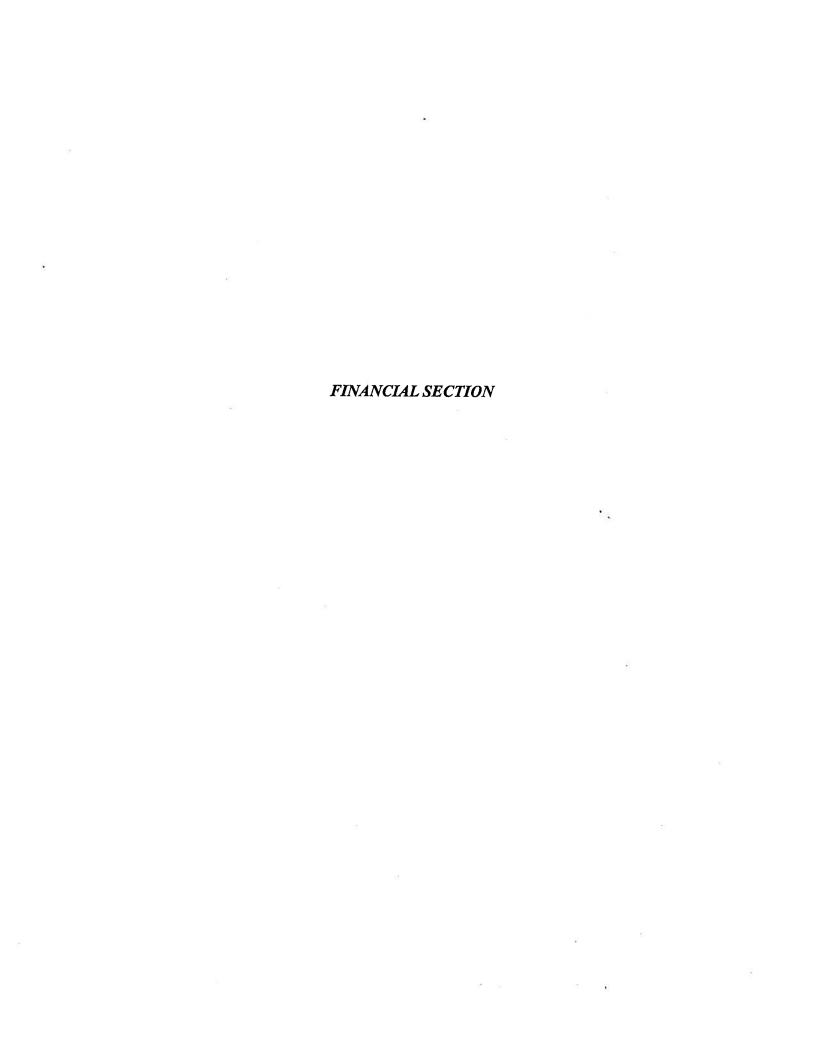

For its Comprehensive Annual
Financial Report
for the Fiscal Year Ended
June 30, 2006

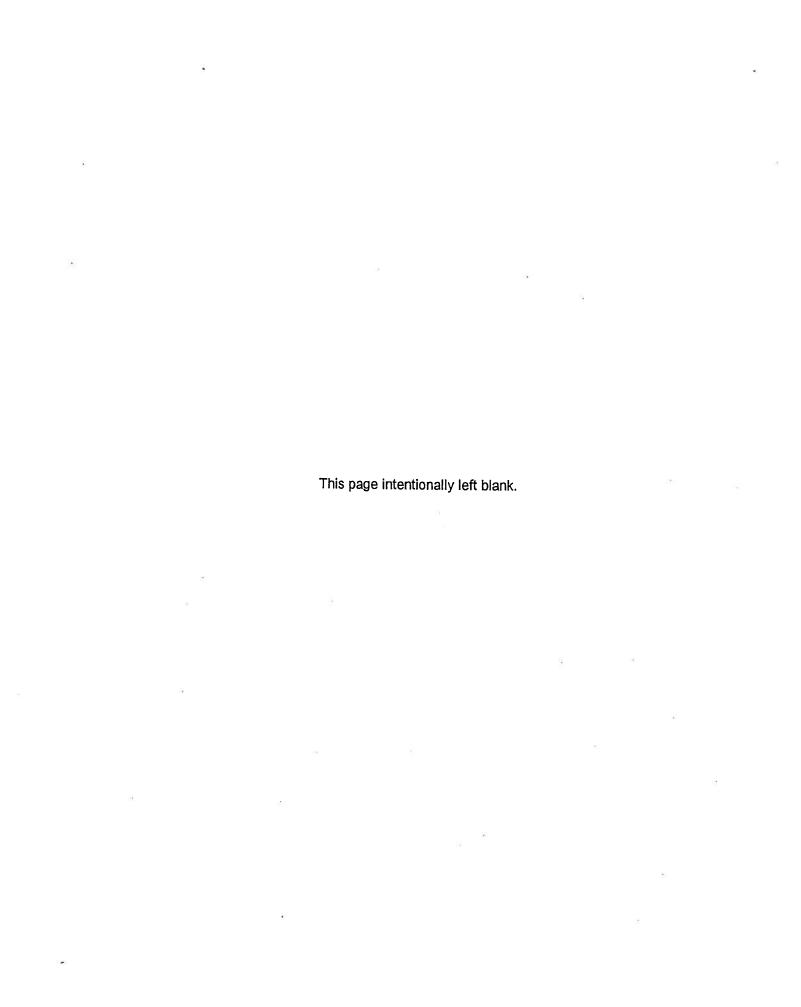

A Certificate of Achievement for Excellence in Financial Reporting is presented by the Government Finance Officers Association of the United States and Canada to government units and public employee retirement systems whose comprehensive annual financial reports (CAFRs) achieve the highest standards in government accounting and financial reporting.

CONTROL OF THE ANGEL OF T

President

**Executive Director** 

#### INDEPENDENT AUDITOR'S REPORT

Honorable Mayor and Council Members City of Tualatin 18880 SW Martinazzi Avenue Tualatin, Oregon 97062-0369

We have audited the accompanying financial statements of the governmental activities, the business-type activities, each major fund, and aggregate remaining fund information of the City of Tualatin, Oregon as of and for the year ended June 30, 2007, which collectively comprise the City's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the City's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the basic financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the basic financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall basic financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the governmental activities, the business-type activities, each major fund, and the aggregate remaining fund information of the City of Tualatin, Oregon as of June 30, 2007 and the respective changes in financial position and cash flows, where applicable, thereof and the respective budgetary comparisons for the General Fund and major special revenue fund for the year then ended, in conformity with accounting principles generally accepted in the United States of America.

Management's Discussion and Analysis is not a required part of the basic financial statements, but is supplementary information required by accounting principles generally accepted in the United States of America. We have applied certain limited procedures that consisted principally of inquiries of management regarding the methods of measurement and presentation of the supplementary information. However, we did not audit the information and express no opinion on it.

Our audit was made for the purpose of forming an opinion on the basic financial statements taken as a whole. The other supplementary information in the table of contents is presented for purposes of additional analysis and is not a required part of the basic financial statements of the City of Tualatin, Oregon. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly presented in all material respects in relation to the basic financial statements taken as a whole.

The data presented in the accompanying statistical and introductory sections, as listed in the table of contents, are presented for purposes of additional analysis and are not a required part of the basic financial statements. This information has not been subjected to the auditing procedures applied in the audit of the basic financial statements and, accordingly, we express no opinion on such data.

GROVE, MUELLER & SWANK, P.C. CERTIFIED PUBLIC ACCOUNTANTS

Charles A. Swank, A Shareholder

December 21, 2007

#### **Management's Discussion and Analysis**

As management of the City of Tualatin and the Tualatin Development Commission, we include this narrative presenting an overview and analysis of the financial activities of the City of Tualatin and Tualatin Development commission for the fiscal year ended June 30, 2007.

We request readers to consider this information with the letter of transmittal in the Introductory Section following the Table of Contents.

#### **Financial Highlights**

- The assets of the City of Tualatin exceeded its liabilities at the close of the most recent fiscal year by \$175,576,557. Of this amount \$12,032,640 (unrestricted net assets) may be used to meet the government's ongoing obligations to citizens and creditors.
- The government's total net assets increased \$10,153,624. This increase represents the sum of an increase in governmental activities of \$6,680,360 and business-type activities of \$3,473,264.
- As of the close of the most recent fiscal year, the City of Tualatin's governmental funds reported combined ending fund balances of \$39,514,391. More than 90% of this total, \$39,421,711, is available for spending on the government's programs (unreserved fund balance).
- At the end of the 2007 fiscal year, unreserved fund balance for the General Fund was \$4,520,546 or 41% of the total General Fund expenditures.

The City of Tualatin's total debt, including bonds, leases, loans, and compensated absences increased \$2,308,871 during the year. The primary factor in this increase was the issuing of \$4,225,000 of general obligation bonds to construct a new library.

#### **Overview of Financial Statements**

These financial statements comprise three components: 1) fund financial statements, 2) government-wide financial statements, and 3) notes to the financial statements. This report also contains other supplementary information in addition to the basic financial statements themselves.

Each of these components serves an important purpose in providing information about the financial position and financial activities of the City of Tualatin and Tualatin Development Commission.

#### **Government-wide Financial Statements**

The *government-wide financial statements* provide a broad overview of the City's finances, operations and general health <u>as a whole</u>. Financial reporting at this level uses a perspective similar to that found in the private sector with its basis in full accrual accounting and elimination or reclassification of internal activities.

Fund financial statements report short-term accountability focusing on the use of spendable resources and the balances of spendable resources at year-end. These statements cannot be used as a barometer to measure the performance of the government as a whole. The <u>government-wide financial statements</u> were designed to provide readers with a broad overview of the City's finances, in a manner similar to private-sector business.

The first of these government-wide statements is the <u>Statement of Net Assets</u>. This statement presents information on all of the City of Tualatin's assets and liabilities, with the difference between the two reported as *net assets*. In other words, this statement compares what the government *owns* to what it *owes* and, although there are differences and qualifiers, it is a loose parallel to what average citizens understand as "owners equity" or "net worth".

Over time, increases and decreases in net assets may serve as a useful indicator of whether the financial position of the city is improving or deteriorating. Other factors being equal, the extent by which assets exceed liabilities is a cushion to be called upon during stressful economic times.

Net assets is comparable to owner's equity in for-profit businesses and this measure was developed to fill the void which existed before new accounting standards to measure the long-term viability of governmental units. Evaluation of the overall health of the city would extend to other non-financial factors such as the conditions of City infrastructure, in addition to the other financial information provided in this report.

The second government-wide statement is the <u>Statement of Activities</u>, which presents information showing how the government's net assets changed during the most recent fiscal year. All changes in net assets are reported as soon as the underlying event giving rise to the changes occurs, regardless of the timing of related cash flows. Thus, revenues and expenses are reported in this statement for some times that will only result in cash flows in future fiscal periods (e.g., uncollected taxes and earned, but unused, vacation leave).

The obvious advantage to such an approach is to nurture a long-term prospective by emphasizing the effects of yearly budget decisions on long-term goals. Such a perspective enforces the need to use sound financial policies such as maintaining adequate reserves and paying current costs from current revenues.

The government-wide financial statements distinguish functions of the City of Tualatin that are principally supported by taxes and intergovernmental revenues (*governmental activities*) from other functions that are intended to recover all or a significant portion of their costs through user fees and charges (*business-type activities*).

Governmental activities at the City of Tualatin include general government, public safety, highways and streets, economic development, and culture and recreation.

The business-type activities include maintenance of water and sewer systems including pipes and lift stations. Water is purchased from the City of Portland. Clean Water Services and the City of Lake Oswego provide sewer treatment services; therefore, the City does not maintain treatment plants.

The government-wide financial statements include not only the City of Tualatin itself (*the primary government*), but also the Urban Renewal Agency of the City, the Tualatin Development Commission. The Agency is a <u>blended component unit</u> and, in substance is part of the City's operations, although it is a legally separate entity. Separate financial statements of the Agency can be obtained from the Finance Department of the City at 18880 S.W. Martinazzi Avenue, Tualatin, Oregon, 97092.

#### **Fund Financial Statements**

A *fund* is a grouping of related accounts that is used to maintain control over resources that have been segregated from specific activities or objectives. Fund financial statements focus on the most significant funds rather than the City as a whole. The use of fund financial statements is directly related to the budgeting process because some revenues are legally earmarked for certain kinds of expenditures. Fund financial statements ensure and demonstrate compliance with governmental finance-related laws and regulations.

In addition, the <u>total amount</u> of the budgeted appropriations for expenditures is considered in terms of the revenue available to fund the expenditures and the type of expenditures competing for the same dollars. The City of Tualatin's funds can be divided into two primary categories: governmental funds and proprietary funds.

Governmental funds. Governmental funds are used to account for essentially the same functions reported as governmental activities in the government-wide financial statements. However, unlike the government-wide financial statements, governmental fund financial statements focus on near-term *inflows* and *outflows*. Such information may be useful in evaluating a government's near-term financial requirements (current liabilities).

Because the focus of governmental funds is narrower than that of the government-wide financial statements, it is useful to compare the information presented for *governmental funds* with similar information presented for *governmental activities* in the government-wide financial statements. By doing so, readers may better understand the long-term impact of the government's near-term financing decisions. Both the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances provide a reconciliation to facilitate this comparison between *governmental funds* and *governmental activities*.

The City of Tualatin maintains twenty-three individual governmental funds. Information is presented separately in the governmental fund balance sheet and the governmental fund statement of revenues, expenditures, and changes in fund balances for those considered to be major funds. Data from the remaining governmental funds are combined into a single aggregated presentation. Individual fund data for each of these non-major governmental funds is provided in the forms of *combining statements* elsewhere in the report.

Proprietary funds. The City of Tualatin maintains six proprietary funds – these funds are enterprise funds used to report the same functions presented in business type activities in the government-wide financial statements. Proprietary funds have been reported with accounting procedures similar to for-profit companies in the past, even before new accounting standards were adopted. Whereas, infrastructure accounting is relatively new for governmental funds, Tualatin, like other cities, always maintained detailed record of the sewer and water systems, including the computation of related depreciation for the systems.

These proprietary funds include Water Fund, Water SDC Fund, Water Bond Fund, Water Reservoir Project Fund, Sewer Fund and Sewer SDC Fund.

#### **Notes to the Financial Statements**

The Notes to the Financial Statements are an integral part of the financial statements. These notes not only provide additional detail, but also are required to fully understand the financial data as presented, as well as the financial condition of the City as a whole. The notes offer information not only to lay readers and citizens, but also those interested in a detailed study of the City's financial operations.

#### **Government-wide Financial Analysis**

In 2006-07 the City of Tualatin's assets exceeded its liabilities by \$175,576,557. Of this amount, 71 percent of the City's net assets (\$125,530,765) were invested in capital assets, land, buildings, machinery and equipment, less the outstanding related debt used to acquire these assets. These assets are not a source for repaying liabilities now, or in the future, since such assets represent the "business of the City". Other resources must be used to pay for outstanding liabilities, some of which are restricted to only certain uses. This requires the City to not only acquire those capital assets necessary to provide for City services, but to retain the ability to finance these acquisitions and provide maintenance for these assets.

An additional portion of net assets (\$38,013,152) are restricted as to how they may be used by budgetary, legal and external factors. The unrestricted amount of \$12,032,640 (1% of net assts) can be used to meet on-going obligations. Of the total \$26,566,691 of liabilities at year-end for governmental and business-type activities, \$20,321,517 are due in more than one year. For the government as a whole, and for the separate governmental and business-type activities, all three categories showed a positive net asset balance for fiscal year 2006-07, as they did for 2005-06.

The *Statement of Net Assets* and the pie chart of Revenues by Source highlight some of the most important factors about the governmental funds, particularly the General Fund. The Primary revenues for governmental funds are taxes, fees and licenses, and intergovernmental revenues. The two largest sources of revenues for the City of Tualatin's General Fund are property taxes and franchise fees. The City's financial position was bettered by \$10,153,624 in the current year.

The State of Oregon does not have a sales tax and there has been a long history of its citizens opposing one. This puts great stress on property taxes, franchise fees, and other revenue in the governmental sector. Property taxes are limited several ways by State law.

- Local governments' total share of property taxes cannot exceed \$10 per thousand of taxable assessed value; for school districts, the limit is \$5 per thousand.
- In 1999, taxpayers voted for a measure which limited assessed value increases from one year to the next to the lower of a 3% increase or the market value unless additional improvements or modifications have been made to a property.
- At the time of property tax reform, each local government was assigned a permanent tax rate. The City's rate is \$2.265 per \$1,000 assessed value. This rate cannot be changed without a vote passed by a "double majority" (more that half of the registered voters vote and more that half of the voters approve the measure).

The City's permanent tax rate is relatively low in contrast to comparable cities in the State. The City has been able to maintain services by budgeting conservatively and by attracting development to raise assessed value. The charts showing governmental expenses versus governmental activities demonstrate the funding challenges that Tualatin and other cities face.

Some of the important factors, which make allocation of resources difficult include:

- Governmental resources are restricted in many ways-budgeting, legal and by public opinion.
- Programs funded by general resources typically result in hard choices, such as more police or a better library. Those services which are seen as most important and necessary are almost always least able or likely to assess charges for cost recovery even for direct services.
- Public support and opinion is important to serving citizens. Yet, it is very difficult for average citizens to understand the impact or even the cost of their decision. The true cost of certain services is hard to measure and the relative cost between two services is harder still. Public safety is usually a high propriety for citizens. One policeman's salary for a year may not seem to be much. However, each sworn officer requires extensive, on-going mandatory training, uniforms and expensive safety equipment in addition to support staff, insurance and high fringe benefits. It is very difficult to weigh such costs against other competing costs such as building a skate park or providing after school programs that might keep teenagers occupied and out of trouble after school.

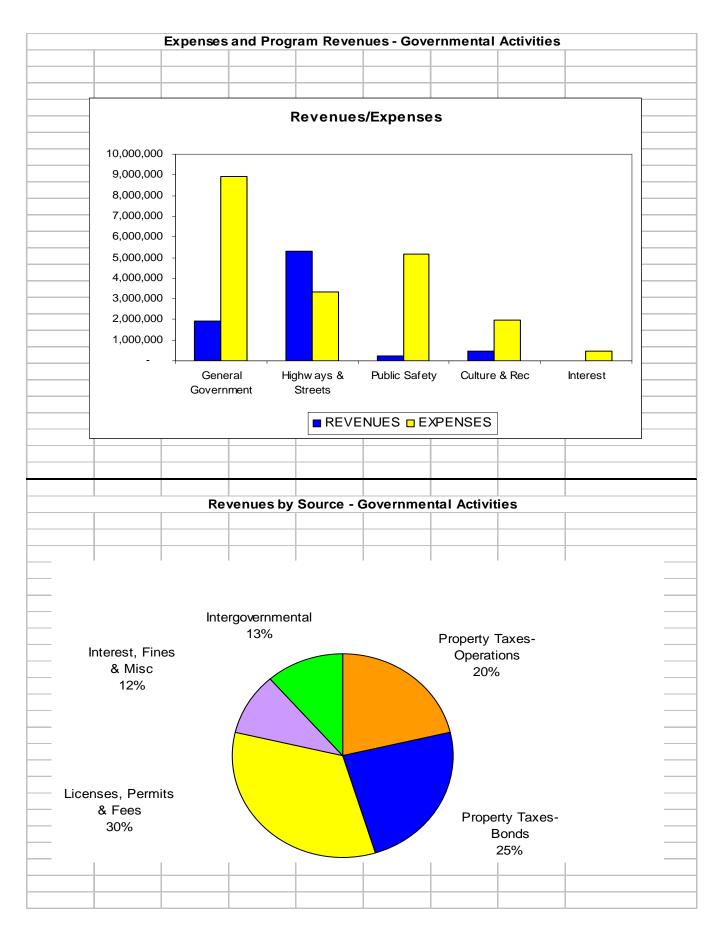

The City of Tualatin is hindered and helped by being a relatively affluent suburb of a large metropolitan area. The City has been successful in attracting high-end development with a balance of residential, retail and light manufacturing. This balanced growth has partially served as a buffer to the low tax rate. Tualatin's construction of a 100,000 square feet high-end retail space (Bridgeport Village, adjacent to I-5, the State's primary north-south freeway) with shops and restaurants has attracted other retail development. Construction on these retail centers, the Point at Bridgeport and Bridgeport Commons continues.

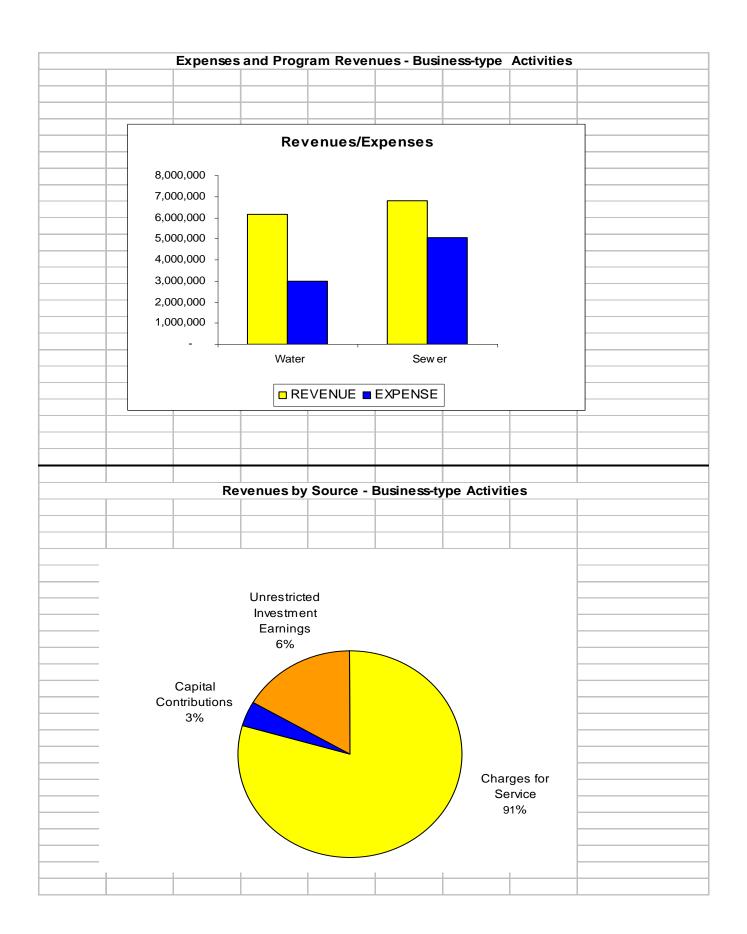

However, as build-out of the City occurs, it is likely to become more difficult to handle the inevitable rise in the cost of services. Regional transportation issues and the high development in the southwestern part of Washington County will continue to present challenges to the high quality of life that the citizens of Tualatin have experienced in the past.

T			<del></del>				

Governmental charges for services decreased by approximately \$400,000 due primarily to property sales in the prior year. Operating grants decreased by over \$900,000 due primarily to public safety grants in the prior year that were not renewed in the current year. Capital grants decreased by over \$1,500,000 due to reduced system development charges (SDC's). Increases in governmental expenses are due primarily to personnel costs.

#### **Financial Analysis of Business-type Funds**

Business activities in 2006-2007 increased net assets by \$3,473,264. This is primarily due to the increased charges and reduced expenses in the Water Fund.

A plant maintained by Clean Water Services, a special district, serves the majority of sewer customers in the City of Tualatin. The remaining sewer customers are serviced by the City of Lake Oswego's plant. Tualatin maintains pipes and lift stations within the City. Whereas Clean Water Services is instrumental in the rate setting for sewer services and the City of Tualatin has relatively young infrastructure this allows for some building of reserves. These reserves will be badly needed as the City's system ages.

#### Capital Assets Reporting and Activity During the Year

Capital improvements for the City of Tualatin increased by \$9,156,003 in fiscal year 2006-07. This investment in capital assets includes land, construction in progress, improvements, machinery and equipment and infrastructure. The governmental infrastructure category consists primarily of roads, signals and lighting. Capital assets in the business-type activities include water and sewer lines, lift stations and other portions of utility systems.

Major capital events during the current fiscal year included the following:

- Over the past two years, the City expended \$7,411,459 for an expansion to the City's water system including construction of a five million gallon water reservoir and the retrofitting of four existing water reservoirs and three pump stations to meet current seismic loading standards. A revenue bond in the amount of \$7,305,000 was issued in the prior fiscal year to fund these improvements that will help assure adequate quantity and quality of the City's future water supply.
- City Center improvements were made to Boones Ferry Road, a major street in the center of the City. Underground utilities have been upgraded, the roadway widened, and sidewalk pedestrian amenities added. Preparation continued for a light rail commuter train station to be constructed immediately adjacent to this street and will include a shelter, benches, bike facilities and public art. As part of the Washington County Commuter Rail Line, this line will connect to the Tri-Met Max light rail into Portland, Oregon, and extend south to the City of Wilsonville. By year-end, \$4,747,926 had been expended for this City Center location over the past two years.
- The City continues to add and improve infrastructure as a prerequisite to new development, particularly in the downtown area and Bridgeport Road area, where significant retail space is being developed. The City funds some of this and some comes via contributed capital.

Additional information concerning capital assets is available in the Notes to the Financial Statements. Note A provides a discussion of City policies regarding capital assets and Note E shows a schedule of the year's activity for governmental funds and business-type funds.

#### **Financial Analysis of Governmental Funds**

The City of Tualatin uses fund accounting to ensure and demonstrate compliance with legal requirements.

Governmental funds provide information about near-term inflows, outflows and balances of spendable resources, which are consistent with the way the city budgets the individual funds. Such information is a useful measure of a government's net resources available for spending at the end of the fiscal year. Net assets for the City's governmental funds increased from \$118,569,376 in 2006 to \$125,249,738 in 2007.

Total revenues decreased from \$25,754,060 to \$24,523,693 before transfers. Expenses increased from \$17,618,714 to \$19,834,483, a modest increase considering inflation and changes in programs. The decrease in revenues was due in part from the increase in property taxes based on increased assessed value and charges for services.

Expenditures for general government and reserve funds are less than budgeted. In the General Fund, it is the policy of the city to budget at least 15% of the total budget for personnel services, materials and services and capital in contingency. Transfers from contingency rarely exhaust the sum and with additional amounts put in reserves it is expected that the fully budgeted amounts will not be expended. Other governmental funds routinely budget reserves, which are not expected to be expended. For instance, the Building Division of the Engineering Fund has in reserves six months of operational costs to carry the fund for short-term downturns in revenues, because of cyclical expenditures.

Oregon cities continue to be confronted with legal actions to amend laws requiring payment of utilities to the cities where they do business. This is particularly true for telephone companies who argue that wireless phones have reduced their revenue and that the use of right-of-ways is no longer a factor as it is with traditional phones. This is particularly difficult for the General Fund because franchise fees are the second highest percentage of revenue to that fund.

#### **General Fund Budgetary Highlights**

The General Fund is the chief operating fund of the City of Tualatin. At the end of the current year, unreserved fund balance was \$4,455,301. All of these funds were available for short-term expenditures. As a matter of course, the City strives to have enough reserves at the end of the fiscal year to provide cash for the first five months of operations at which time the first installment of property taxes are received. The fund balance decreased from an unreserved beginning fund balance of \$5,125,815. The decrease of the fund balance is due mainly to the creating of the City Center Remodel Fund. In December 2006, the City Council approved a Supplemental Budget to transfer \$490,000 from the General Fund to the City Center Remodel Fund, a new fund created to account for the expansion of the Building Division, replacement of a failing HVAC system, and changes required by the library expansion such as the creation of a new lobby area and new restrooms.

### Significant Differences in Variations in Revenues and Expenditures & Differences Between Actual and Budgeted Figures

The City sold a bond of \$4,225,000 on November 7, 2006 in response to community support for increased library services. The City began the physical library expansion from 8,500 to 20,000 square feet in April of 2007. In 2007, the amount of more than \$1,600,000 was spent on consulting services for remodeling, temporary relocations, conceptual design, and construction work. The anticipated completion of the project will be in May of 2008.

#### **Discussion of Significant Changes in Individual Fund Balances**

The Leveton Tax District Project Fund increased in 2007 to \$10,680,664 from \$9,161,440 in 2006. This increase occurred because the projects associated with extending 124<sup>th</sup> Avenue from Myslony Street to Tualatin-Sherwood Road was delayed due to a right-of-way acquisition and the Herman Road design progressed at a slower pace than expected resulting in substantially reduced expenditures.

During 2006-07 projects totaling more that \$3,000,000 were completed into the Library/Parks Improvement Fund including the completion of a bicycle and pedestrian bridge over the Tualatin River connecting to the pathway in Community Park. The bridge connects the cities to Tualatin, Tigard and Durham. Another project was the purchase of additional land for trail construction and the completion of the Tualatin River Greenway Master Plan. These projects are part of an on-going effort to make Tualatin a pedestrian and bicycle friendly city, providing outdoor activities for adults and children and are funded partially by bond proceeds, as well as outside funding (in the case of the pedestrian bridge).

The Central Urban Renewal District Projects Fund balance decreased form \$8,103,077 to \$5,933,793 during the year. This is the result of major capital expenditures for infrastructure, street widening, and pedestrian improvements in the downtown area. These expenditures are related to preparation for a commuter rail station that will pass through the city center and connect to the mass transit station in Beaverton, connecting on to Portland.

#### **Debt Administration**

City of Tualatin's Debt Service											
Years 1	Ended .	June 30,	20	07 and 2	006	5					
	Beg	inning	A	dditions	R	eductions		Ending			
General Obligation Bonds	\$	7,380,000	\$	4,225,000	\$	(355,000)	\$	11,250,000			
Urban Renewal Bonds		4,250,000		-		(1,220,000)		3,030,000

*Limited Tax Bonds		700,000		-		(80,000)		620,000			
Total Bonds Payable	\$	19,635,000	\$	4,225,000	\$	(1,900,000)	\$	21,960,000			

The limited tax bond does not require a payment on principal until the final year of the bond, however, the City has been paying principal most years.

Additional information concerning long-term debt is available in the Notes to the Financial Statements, Note A and Note H.

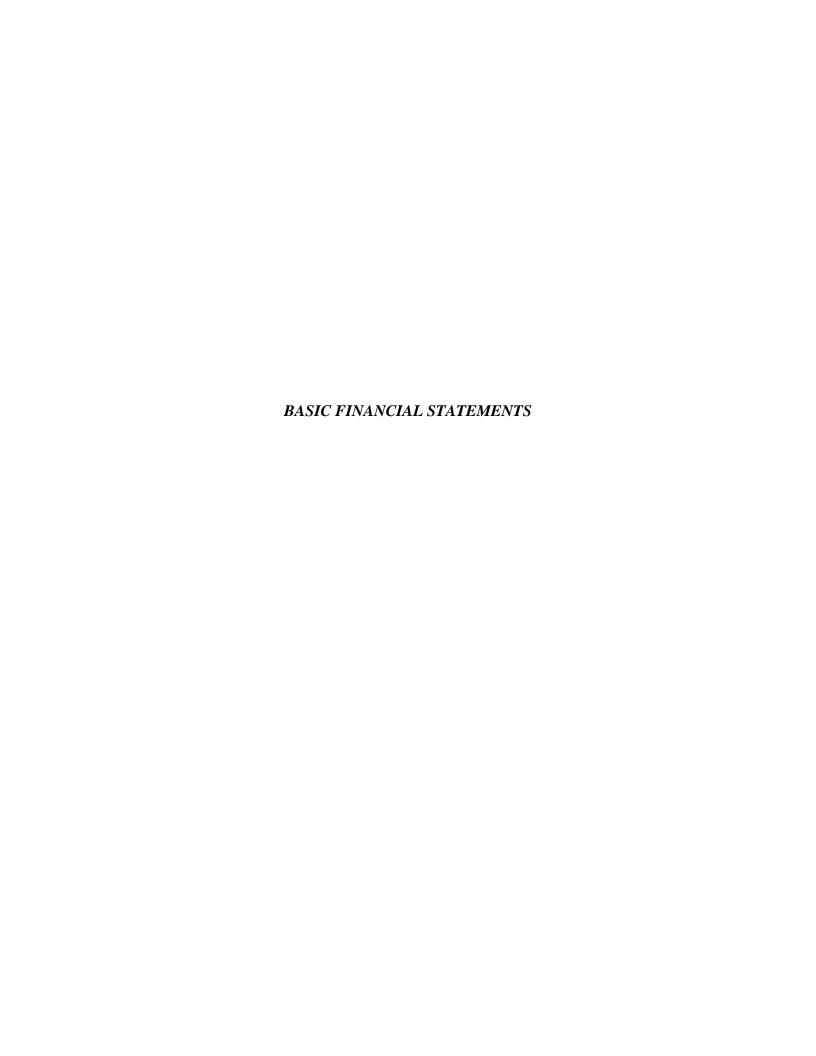

#### **Economic Factors and Next Year's Budget**

Factors affecting financial conditions in the future include:

- Future projections indicate the City will most likely not duplicate the growth levels of recent years. With the City's low permanent tax rate of \$2.265 per thousand assessed value, this is likely to require adjustments in the future to maintain the same levels of services, particularly for General Fund. These sources might include on the revenue side—increases in fees for services, operating levies and increases in franchise fees.
- Tualatin's location in the Portland metropolitan area is very much affected by the transportation issues associated with urban areas. One important project, which may have a great effect on Tualatin's economy, both directly and indirectly, is the I-5 (the major north-south highway in the State) to 99W Connector Project. Regional and local transportation plans have recognized the need for this transportation improvement for more than a decade.

This financial report is designed to provide a general overview of the City of Tualatin's financial activities and position.

Questions concerning any of the information provided in this report or requests for additional financial information should be addressed to the Finance Director, City of Tualatin, 18880 S.W. Martinazzi Avenue, Tualatin, Oregon, 97062-7092.

	CITY OF TUALATIN
	NOTES TO FINANCIAL STATEMENTS
	JUNE 30, 2007
NOTE A - ORGANIZATION AND SUMMARY OF S	SIGNIFICANT ACCOUNTING DOLIGIES
NOTE A - ORGANIZATION AND SUMMARY OF S	SIGNIFICANT ACCOUNTING POLICIES
Financial Report Entity	
The City of Tualatin is a municipal corporation gove	erned by an elected seven-member council.
These financial statements present the City of	Typication and its commonwest unit the City of Typication
	Tualatin and its component unit, the City of Tualatin Agency of the City (the Agency) for which the City is
	as a blended component unit and, in substance, is part of
	arate entity. Separate financial statements of the Agency
	the City, 18880 S.W. Martinazzi Avenue, Tualatin, Oregon
97062.	
The agency is governed by the same governing b	ody as the City of Tualatin. The Agency is reported in a
special revenue fund, capital projects funds and de	
2. Government-wide and fund financial statements	<u>.</u>
The second secon	e statement of net assets and the statement of changes in
	on-fiduciary activities of the primary government and its ect of interfund activity has been removed from these
	rmally are supported by taxes and intergovernmental
	type activities, which rely to a significant extent on fees
and charges for support.	
The statement of activities demonstrates the dec	gree to which the direct expenses of a given function or
	t expenses are those that are clearly identifiable with a
	es include 1) charges to customers or applicants who
purchase, use, or directly benefit from goods, serv	ices, or privileges provided by a given function or segment
and 2) grants and contributions that are restricte	d to meeting the operational or capital requirements of a
-	items not properly included among program revenues are
reported instead as general revenues.	
	are available for use, it is the City's policy to use restricted
resources first, then unrestricted resources as the	y are needed.
Congrete financial etatements are provided for an	ourremental funds and proprietory funds. Major individual
	overnmental funds and proprietary funds. Major individual e funds are reported as separate columns in the financial
statements.	c iunus are reporteu as separate columnis in the illidificial
otatomonto.

	NOTES TO FINANCIAL STATEMENTS				
			JUNE 30, 2007		
NOTE H - LONG-TERM DEBT					
General Obligation Bonds					

The City issued general obligation bonds to provide funds for the acquisition and construction of major capital facilities. General obligation bonds have been issued for governmental activities only. General obligation bonds were issued in February 1999 in the amount of \$3,970,000 for the construction of a police facility. The bonds have an interest rate ranging from 3.50 to 4.65% with final maturity in 2019. The principal balance outstanding at June 30, 2007 is \$3,460,000. In 2005 the City of Tualatin issued bonds for parks improvements in the amount of \$3,785,000; outstanding at June 30, 2007 was \$3,565,000. In 2006 the City issued \$4,225,000 for library improvements.

		,
Purpose	Interest rate	Amount
Governmental activities - Police facility	3.50 - 4.65%	\$ 3,460,000

	NOTES TO FINANCIAL STATEMENT					
	JUNE 30, 2007					
NOTE H - LONG-TERM DEBT (Continued)						
Limited Tax Improvement Bonds						

In 1998, the City issued Limited Tax Improvement Bonds for a street improvement project in the amount of \$2,460,000 with an interest rate of 4.70%. The City has pledged all assessments levied within a Local Improvement District to pay the debt service on the bonds. Principal on the debt is not due until 2014, however, the debt was structured to allow payment of principal as assessment payments and pre-payments are received. In most years principal has been called in round lots and to date, \$1,840,000 of the principal has been paid.

During 2005-06 the City of Tualatin sold revenue bonds in the amount of \$7,305,000 to be payable solely from net revenue of the City's water system. The proceeds are to be used primarily for construction of a five million gallon water reservoir and the retrofitting of four existing water reservoirs and three water pump stations to meet current seismic loading standards. The City covenants for the owners of all Series 2005 bonds to establish and maintain rates and charges in connection with the operation of the System which, when combined with other Gross Revenues, are adequate to generate net revenues for each year at least equal to 1.25 times annual Bond Debt Service due in that fiscal year and net operating revenue after the deduction of system development charges equal to 1.15 times annual debt service due in the fiscal year. Interest rates for this bond range from 4.25 % to 4.5%.

# COMBINING BALANCE SHEET NON-MAJOR GOVERNMENTAL FUNDS Special Revenue Funds These funds account for revenues, primarily from charges for services and licenses and permits which are used for specific purposes. Funds included in the Special Revenue category are: Engineering Fund - accounts for revenues from various fees collected from builders for the construction of buildings and expended for services rendered primarily by the City's building and engineering department. Operations Fund - accounts for resources used to provide certain City administrative and maintenance functions for the water, sewer and street funds. Storm Drain Fund - accounts for storm drainage fees from the property located within the City and business owners to maintain the storm drain systems. Road Utility Fee Fund - accounts for road utility fees from the property located within the City and business owners to maintain pavement maintenance and street lighting. Road Gas Tax Fund - accounts for gas taxes received from the State of Oregon and Washington County for the operation and maintenance of the street system, traffic signals, bike paths and landscaping of roadside areas. Core Area Parking Fund - accounts for parking fees from the property located within the City and business owners to develop additional downtown parking areas and maintain existing parking areas. Tualatin Science and Technology Fund - accounts for scholarship awards. Road SDC Fund - accounts for funds received from systems development charges and used for system improvements. Storm Drain SDC Fund - accounts for funds received from systems development charges and used for system improvements. Urban Renewal Fund - accounts for the general operations of the City's Urban Renewal Agency. **Debt Service Funds** The Debt Service Funds account for the payment of principal and interest on General Obligation Improvement Bonds, Bancroft Improvement Bonds and Tax Increment Bonds. Funds included in this category are: General Obligation Bond Fund - accounts for the payment of principal and interest on general obligation bonds. Resources are provided by property taxes. **Capital Project Funds** These funds account for the construction and acquisition of capital assets financed by bond sales and interest earnings. Funds included within this category are: Capital Projects Fund - accounts for the construction of major capital assets of the City. Resources are provided primarily by the sale of General Obligation and Bancroft Improvement Bonds. Infrastructure Fund - accounts for accumulation of funds to construct future capital projects. Resources are provided by other city funds. City Center Remodel Fund - accounts for improvements to city-owned properties. Resources are provided by transfers in from other funds.

# STATISTICAL SECTION

The Statistical Section of the comprehensive annual financial report presents detailed information as a context for understanding what the information in the financial statements, note disclosures and required supplementary information says about the overall financial health of the City of Tualatin.

# FINANCIAL TRENDS

These schedules contain trend information to help the reader understand how the City's financial performance and well-being have changed over time.

# **REVENUE CAPACITY**

These schedules contain information to help the reader assess the City's most significant local revenue source, the property tax.

# **DEBT CAPACITY**

These schedules present information to help the reader assess the affordability of the City's current levels of outstanding debt and the City's ability to issue additional debt in the future.

# DEMOGRAPHIC AND ECONOMIC INFORMATION

These schedules offer demographic and economic indicators to help the reader understand the environment within which the City's financial activities take place.

# **OPERATING INFORMATION**

These schedules contain service and infrastructure data to help the reader understand how the information in the financial report relates to the services the City provides and the activities it performs.

Sources: Unless otherwise noted, the information in these schedules is derived from the comprehensive annual financial reports for the relevant year.

City of Tualatin implemented GASB #34 in 2004, therefore certain ten year schedules are limited.

AUDITOR'S COMMENTS AND DISCLOSURES REQUIRED BY STATE REGULATIONS YEAR ENDED JUNE 30, 2007

### STATE OF OREGON COMPLIANCE SECTION

Oregon Administrative Rules 162-10-000 through 162-16-000 of the *Minimum Standards for Audits of Oregon Municipal Corporations*, prescribed by the Secretary of State in cooperation with the Oregon State Board of Accountancy, enumerate the financial statements, schedules, comments, and disclosures required in annual financial reports. Required comments and disclosures related to our audit of such financial statements and schedules are set forth on the following pages.

Significant Accounting Policies

The significant accounting policies followed in preparing the City's financial statements are summarized in the notes to the financial statements.

Organization and Fund Structure

The organization and fund structure of the City is documented in the notes to the financial statements.

Internal Accounting Control

We have audited the basic financial statements of the City of Tualatin as of and for the year ended June 30, 2007, and have issued our report thereon dated December 21, 2007. As part of our audit, we made a study and evaluation of accounting systems and controls as required by auditing standards generally accepted in the United States of America. The purpose of our study and evaluation was to determine the nature, timing and extent of the auditing procedures necessary for expressing an opinion on the City's financial statements. Our study and evaluation was more limited than would be necessary to express an opinion on the system of internal accounting control of the City taken as a whole. However, our study and evaluation disclosed no condition that we believe to be a signfficant deficiency or material weakness.

Adequacy of Collateral Securing Depository Balances

ORS 295 provides that each depository, throughout the period of its possession of public fund deposits, shall maintain on deposit with its custodians, at its own expense, securities having a value not less than 25% of the certificates of participation issued by the pool manager for funds in excess of those insured by the Federal Deposit Insurance Corporation. Our review of the adequacy of collateral securing depository balances indicated the collateral was insufficient at times during the year ended June 30, 2007.

Indebtedness

The general obligation bonded debt of the City is in compliance with the limitation imposed by law. We noted no defaults in principal, interest, sinking fund, or redemption provisions with respect to any of the City's liabilities, and no breach of the bond agreements, at June 30, 2007.

**Budget Compliance** 

The City has complied with Local Budget Law (ORS 294) in the preparation and adoption of its budget and tax levy for fiscal years ending June 30, 2007 and 2008, except as noted in the notes to the financial statements.

Insurance and Fidelity Bonds

We have reviewed the City's insurance and fidelity bond coverage at June 30, 2007. We ascertained that such policies appeared to be in force and in compliance with legal requirements relating to insurance and fidelity bond coverage. We are not competent by training to comment on the adequacy of the insurance policies.

# CITY OF TUALATIN, OREGON

AUDITOR'S COMMENTS AND DISCLOSURES REQUIRED BY STATE REGULATIONS (Continued) YEAR ENDED JUNE 30, 2007

## STATE OF OREGON COMPLIANCE SECTION (Continued)

Highway Funds

The City complied with the legal requirements, Article IX, Section 3a of the Oregon Constitution pertaining to the use of revenue from taxes on motor vehicle fuel, and the statutory requirements of ORS 294, 368 and 373 as they pertain to the use of road funds.

Programs Funded from Outside Sources

We have reviewed the City's compliance with appropriate laws, rules, and regulations pertaining to programs funded wholly or partially by other governmental agencies. The City is in compliance with the guidelines in all material respects.

Investments

Our review of deposit and investment balances indicated that the City was in compliance with ORS 294, as it pertains to investment of public funds, during the year ended June 30, 2007.

Public Contracting and Purchasing

Our review of the City's public contracting, purchasing procedures and construction of public improvement requirements (ORS 279) indicated that the City was in compliance.

Financial Reporting Requirements

We have reviewed financial reports and other data relating to programs funded wholly or partially by other governmental agencies. This data, filed with other governmental agencies, is in agreement with and supported by the accounting records.

Schedule of Accountability of Independently Elected Officials

There are no elected City officials who collect or receive funds on behalf of the City.

This report is intended for the information and use of the City Council and management of the City of Tualatin and is not intended and should not be used by other than those specified parties.
