Mathematical Art

Items Needed:
Graph Paper
Writing Utensil
Formulas for Pi and the Fibonacci sequence

Instructions:
Draw a baseline on the bottom of your graph paper
Using the formula for pi, count upwards from your baseline for each number and mark a horizontal line across the top of that box
Once you have drawn your marks across your page, connect these lines to each other horizontally
Color in the resulting skyline however you wish
Use the numbers in the Fibonacci sequence to create squares, i.e., for the number 5 create a 5 x 5 square, etc. to represent clouds in the sky
