

# Monster Eyeballs

## Items needed:

Eggs  
Vinegar  
Bowls  
Food Coloring  
Highlighter  
Correction fluid  
Paint markers

## Instructions:

- Place food coloring in various bowls
- If using, pull out the tube from the highlighter and squeeze the ink into a container
- Pour vinegar in bowls and stir until color is incorporated
- Gently lower eggs into the vinegar, making sure they are completely submerged
- Let sit for 24 to 36 hours; the longer you leave them, the stronger they will be
- Remove eggs and gently rub them under cold water to remove any shell residue
- Decorate eggs using correction fluid and paint markers
- Put them in a bowl and gross out your friends
- If you used the highlighter, use a black light to make the egg soaked in it glow

Note: these will only keep as long as a normal egg would so make sure to toss them after about three days
