

Oobleck

Oobleck is a non-Newtonian fluid; it has properties of both liquids and solids. You can slowly dip your hand into it like a liquid, but if you squeeze the oobleck or punch it, it will feel solid.

Supplies:

- Corn starch (1 cup)
- Food coloring
- Water (not supplied)

1. Add corn starch to a mixing bowl.
2. Add food coloring and 3/4 cup of water to the bowl.
3. Mix and mix and mix.
4. **PLAY!** Try squeezing it, or dragging your fingers through it, or rolling it into a ball. Put it in a baggie and see what happens when you toss or poke the baggie. Have fun!

A WORD OF CAUTION: This stuff can be messy. Don't put it on a couch or a carpet.
