

Paper Speaker

Items Needed:

Cardboard tube (paper towel size)
Two paper cups
Two squares of paper towels
Pencil
Paper
Craft Knife

Instructions:

- On a piece of paper draw around the base of the phone you are going to use for the speaker
- On that same piece of paper draw a circle around one of the ends of the paper tube
- Cut these templates out
- Laying the cardboard tube down find the approximate middle and lay down the phone template
- Draw around the paper to mark where the phone will go
- Cut one long side and two short sides of the shape with the craft knife making sure not to cut the other long end
- Bend the shape up along the uncut edge to make the cradle for your phone
- Crumple up paper towels and insert loosely in each end of the cardboard tube
- Using the circle template draw circles on the two paper cups at roughly the same place on each
- Cut out the circles
- Slip each end of the cardboard tube into the two cups through the cut circles
- Lay down the tube and fit the phone in its cradle
- Play music and enjoy
