

Walkng Horse

Items Needed:

Cardstock (paper will work but cardstock is sturdier)
Pencil
Ruler
Scissors
Things to make a ramp

Instructions:

Using a ruler and pencil, mark out a 15cm by 4.5cm rectangle then divide the sections as shown below:

Cut around the rectangle and along the dotted lines making sure you cut the front legs along the curve.

Fold legs into the body towards each other.

Fold tail up away from legs.

Fold head up away from legs then in half to get a head shape.

Create ramp keeping in mind that you may need to change the friction of the walking surface and/or the height of the ramp until you can achieve the rocking motion. I used three cookbooks and a bamboo cutting board.
