

## POM POM CATERPILLAR

### Supplies:

- Pom poms (20, assorted color & size)
- Googly eyes (4)
- Green cardstock leaves
- Tongue depressors (2)
- School glue (not supplied)
- Scissors (not supplied)

### Instructions:

1. Cut out a green leaf. Use your scissors to create a feathered edge around the leaf if you want to be fancy. (See picture - make lots of little cuts around the outside edge.)
2. Draw a line of glue in an "S" shape on the cut green leaf.
3. Place pom poms in the line of glue.
4. Put glue on the back of two googly eyes and place the eyes on the first pom pom in your line.
5. Finally, put some glue on the tongue depressor and place your caterpillar/leaf on top of the tongue depressor.
6. Let the whole thing dry and do the second one.
