

# Exploding Lunch Bags

## What you need:

1 baggie (freezer bags work best)

1 Tbs baking soda

$\frac{1}{4}$  cup warm water

$\frac{1}{2}$  cup vinegar

Tissue or toilet paper

## How you do it:

1. First, pour the warm water into the baggie.
2. Next, add the vinegar to the baggie.
3. Place the tablespoon of baking soda into the middle of the tissue and wrap it into a ball.
4. Partially zip the baggie closed, leaving just enough space to stuff in your tissue-wrapped baking soda.
5. Now put your tissue-wrapped baking soda into the baggie, and put the entire thing on the ground outside, in a sink, or on cookie sheet away from your face.
6. Watch your bag explode!
