

Make a Glitter Volcano

What you need:

Baking soda, 2 Tbs

Food coloring, 6-7 drops

Glitter, 1 tsp

Dish soap, 1 squirt

Vinegar, ½ cup

Cup / Vase / 2 liter bottle

What to do:

1. Put the baking soda into the cup or vase or 2 liter bottle.
2. Add the food coloring, glitter and dish soap.
3. Place the cup on a sheet pan or other large deep pan.
4. Slowly add the vinegar and see what happens!

Try a few variations:

- What happens if you mix the baking soda, food coloring, glitter & dish soap before adding the vinegar?
- What happens if you add sugar? Or salt?
- What if you put a Lego or small toy into the baking soda? Will it be carried outside of the cup?
