

## Tornado in a Jar

### What you need:

A jar with a tight fitting lid

Water

Dish soap

Small beads or legos or sparkles (optional)

Glitter (optional)

Food coloring (optional)

### How you do it:

1. Fill the jar with water, leaving about 1" space at the top.
2. Add a generous squirt of dish soap (approx. 1 teaspoon) and one or two drops of food colouring.
3. Screw the lid back on securely and swirl it around to mix it.
4. Swirl the jar in a circular motion as fast as you can until tornadoes form.
5. If you're having trouble with too many bubbles, try adding 1 teaspoon of vinegar and using a spoon to scoop out the bubbles on the top.
