

Final Survey: Basalt Creek Parks & Recreation Draft Plan Survey

1. Do you have any thoughts about the plan you would like to share?

- playgrounds, picnic shelter and sports fields
- You apparently forgot about the community need and desire for sports fields/complex.
- Good Plan!
- Pickleball is very popular in this area. From serious player, to social players, and families. Many cities are putting in "dedicated" pickleball courts, with permanent nets. As an avid pickleball player, I see the need for these dedicated courts. Families are more likely to play pickleball if they do not have to set up a net. I see families play at George Rogers park in Lake Oswego on their dedicated courts. It adds to a vibrant community, and is such a fun way for residents to get outdoors and get exercise. For the amount of use these dedicated courts would get, it is well worth the investment. Thank you. Barry Berger Tualatin resident.
- WOW! An amazing amount of thoughtful work. I delight in seeing accessibility being throughout the plan
- Thank you for providing an opportunity to comment on the plan. It appears to be a thoughtful plan that will be visionary and worthwhile IF you secure the parkland before it develops. Otherwise, there will have been a wasted opportunity to improve the livability and quality of life for the residents and people who work in this area of the Tualatin community.

Natural areas and right of way for road(s) and trails adjacent to the main park need to be in addition to the developable acreage you are planning for the main park facilities, which is too small. Please use public art to inspire and interpret the trail and park development.

- Comprehensive plan for parks
- This plan looks awesome! I am thrilled that a park will be created in this area!!
- Comprehensive and well done plan with good public involvement.
- Goal 3 is not achieved by the draft plan. Particularly the goal to "conserve and restore natural areas to support wildlife." Wildlife require areas free from human disturbance to complete their life history needs, as well as habitat to move throughout the landscape. Your plan discusses connecting trails, but not connecting key habitats to facilitate wildlife species movement, which is critical with our changing change. Undercrossings and overcrossings are essential for species movement, in addition to connecting habitats.

- Need more multi-use synthetic turf fields. Tualatin is far behind most other communities.
- I am so happy to see that there is a planned park in South Tualatin. As an avid runner and cyclist we are very excited to see new trails as well.
- Connecting parks and/or greenspaces with trails is of high-importance to me. I really like the idea of staying on a trail and moving between these types of places. Often, it's the trail walk I enjoy the most about a park. The paths don't need to be large, just continuous and contiguous between the parks and/or greenspaces. Some observational stopping points and/or benches along these trails would be a plus.
- comprehensive
- Quiet surprising and disappointing that half of the park site option proposals are in area designated to be manufacturing.
- good plan
- More fields not unusable nature land
- Great!
- Parks that have playgrounds, fields, courts and other things that kids can do
- I believe this was already factored in. Making sure bike lanes are included in the plan to connect Wilsonville, Sherwood and Tualatin.
- Good job, good plan.
- I see a miss in this plan for the West section. Safe walking and biking accessibility to the newly proposed trail system coming from the Ibach neighborhood. To be more specific, Graham's Ferry needs sidewalk and a bike shoulder developed to make it walk/running and bike friendly. There is a nasty bottleneck between Tonquin Loop and Tonquin road on Graham's Ferry that is not safe for biking or walking/running currently.
- okay
- Tualatin desperately needs dedicated pickleball courts not courts that will be shared with other sports! There is already dedicated tennis courts and futsal courts in the area but no dedicated pickleball courts! As a long time resident of Tualatin I would like to be able to play where I live instead of driving to LO, West Linn, or other areas
- Well thought out plan
- Without physically visiting the physical site I feel I am somewhat blind/ignorant. I am not all in support of the bridge over the creek. There are pollution and noise issues in addition to traffic congestion that are not addressed. How will nature trails/expanded walkways cross busy streets? P.22 How will the park and connecting trails address traffic congestion? I love that throughout the plan the goal is to meet neighborhood, employee and community needs. P.28 Should the legend cover almost a quarter of the map? P.98 Stormwater facilities on the east side; does the land itself transfer to the city? In other words, the city maintains them do they also own the facility land? Please use my personal email: marissa@houlbergdevelopment.com
- no
- Make Boones Ferry wide enough to accommodate more traffic lanes. More lanes are needed for existing traffic, which will drastically worsen with new home sites.
- It makes sense to divide the area into three sections given the vast difference in terrain and intended use. I want more information about how the parks and trails (regardless of them being created and operated by the HOA's) in the new development will be connected to and accessible by the existing neighborhoods (especially Norwood Heights).

- The plan looks like it does a good job of taking into consideration how to develop the land in a friendly way for both cars and people!
- Appears to be a comprehensive plan.
- Well thought out
- Tualatin lost out on an opportunity to create multiple multi-use synthetic fields. We are continuing to fall behind surrounding communities.
- Need more sports fields.
- Thank you for all the work on this. I believe we need more turf fields for youth sports.
- We have to prioritize our youth sports. Having multiple sports fields will enhance these parks even more.
- Great connectivity and park ideas
- Very excited to see this plan come to fruition !
- Yes - this needs to have baseball fields / soccer fields. Not just 1 field. Our city lacks sports facilities for our youth.
- More sports fields!!!!
- I am really disappointed that there are not plans for a multiplex baseball field/ lacrosse or soccer. There is plenty of space and the city of Tualatin's little league fields for youths sports is subpar. The surrounding cities, Clackamas, Sherwood, West Linn all have beautiful turf complexes that allow their youth to play outdoors longer than our muddy fields. I would like Tualatin to focus more on our youth. Tualatin has done a great job of having nature parks and walking paths. We need a place where our youth can play that isn't underwater more than half the year. A place that brings people from out of town into our city. The addition of a youth sports complex could bring growth to small businesses during weekend tournament. I think it is a mistake to ignore the opportunity to create a place for children to learn to be a team. I understand not everyone loves sports, I myself was not the best athlete. What I have learned it that youth sports give kids confidence, help foster friendships, help create a sense of community and responsibility. Please consider modifying the plans to help expand opportunities for our youth.
- This plan needs a revision. We as a city a far behind others in this area when it comes to usable space for kids to play sports and be active year round. We need multiple turf fields, a baseball softball complex, and as many milt use spaces as you can fit. Tualatin is the laughing stock when you travel around the state to play tournaments or to be active year round without being in three feet of mud. Bring in teams year round which brings in revenue and keep our kids playing in town instead of looking for club teams down the road.
- Love parks!
- There should be more sports field for soccer. The areas that our kids currently play are less than ideal during the fall and winter months. It was so bad this year that practices were cancelled because of the poor field conditions.
- Okay plan
- The plan is complete and comprehensive.
- The city needs a sports complex. Not any of the proposed options.
- This plan has missed the mark. Our community must put our youth sports as the top priority. Create a sports complex that hells make Tualatin an attractive place to raise families.
- Please create a sports complex.
- No thoughts to share

2. Trail Concept Plan: In addition to the regional trails planned by metro, a set of local pathways are proposed as part of the plan. They will connect residence, employees and community members. After viewing the map below, please let us know your level of support for the local pathways.

	Supportive	Neither	Unsupportive
On-Street trail/widened sidewalk (pink highlight)	69	6	5
Greenway Off Street (green highlight)	71	7	2

3. Do you have any additional thoughts you would like to share about the trail concept plan?

- Build as soon as possible
- I am a walker, and always delighted to have safe walking paths to explore
- I think we have plenty of trails now.
- Ensure the off-street, separated trails are built when the roads are developed. Ensure the relatively flat hard surface is about 16 feet wide for safety and enjoyment of the many users the facilities will support. Design the street lighting to adequately light the pathways as well since the they are an integral part of the transportation system.
- Good plan
- Looks great!
- Good trails plan with connectivity.
- good
- Your definition of 'trails' should not include sidewalks. It is deceiving when you talk about the 'trails' in your plan. The term 'trails' should be restricted to pathways that do not have, and are not adjacent to, motorized vehicles or roads (e.g., walking trails through natural areas).
- We really do need a bike lane on Grahams Ferry from Victoria Gardens to Tonquin. That sections is very dangerous for walkers and cyclists.
- The best part about trails is getting away from traffic and "noise" (at least as much as possible). Aside from general pedestrian mobility/convenience, planning for "trails" next to semi-trucks and heavy traffic doesn't sound too appealing.
- build it
- Good plan
- Parks that have fields and courts, not trails
- Good plan
- I would say more access points to the west sections of the trail via walking/running from the Ibach neighborhood.
- good
- Good plan
- Connected trails are great! Trees and native plants.

- no
- Want the on-street section to connect across Norwood and onto 89th
- NA
- Good connections for walking
- Appears to connect to places.
- Looks like people can get around
- Off street pathways open up opportunities for biking in particular that can reduce car/bike accidents. In favor of both, but lean towards off-street.
- We need more synthetic turf fields and pickleball courts.
- We already have enough parks. Need more sports fields.
- Trails look good.
- Connecting the trail system to potential stops at local coffee shops, breweries, cafes, farmers market, or food card pod would be a great way to make Tualatin an even more livable and lively city.
- Connectivity is good
- Less road trails so kids /dogs can be free and not have to worry about speeding cars
- Please make sure to minimize damage and disturbance to the Koller wetlands, but also please make the gun range close because it is terrible.
- More off street trails, PLEASE!
- More trials are not needed - better playgrounds and sports facilities for our youth is needed
- More sports fields!!!!
- We are not hurting for more trails and people to maintain this spaces.
- Love it
- Good
- You need a trail plan for the whole city. Not just new areas!
- Trails to a sports complex would be great.
- Nothing to share

4. The plan includes different park example designs to give ideas on what a future park might be like. If you could chose one of the four park design ideas, which would you select?

5. Why did you select the park example design you chose?

- I like the ability to incorporate sports or group activities, a field like the lush farms soccer field would be amazing and maybe a future option if the land is prepared for that.
- Playground, courts, sport field
- The only example with a sports field
- I like it that way!
- Most space for things to do.
- Like the more naturalized character of this option.
- No strong feelings
- It's the only concept that seems to have enough space to support youth sports. Considering you would be placing the park on the opposite side of a natural barrier from the residential neighborhoods, I can't see why you would want either sport courts or a "play area". This is very confusing considering the NEED for sports fields in the community.
- Based on the designs options presented, the square is the only shape and size that can accommodate multipurpose sports fields as well as all the other types of facilities shown in the small linear design concepts. Even at that, 10 acres is way too limited to meet the needs of this part of Tualatin and in the future people will wish you had the foresight and vision to at least double the size when you had the chance.

The linear options are fine as additional parklands only after the larger more useful site has been acquired. They can be very useful for those who don't live within a 5 minute walking distance to the main park where most of the bigger gathering will occur.

- Playgrounds, picnic shelters, and trails
- Best one
- I chose option 2 because it utilized the full 10 acres and had options for larger recreational areas.
- It provides a better balance of recreational use and conservation (wildlife and ecological functions). It would be the best solution to meeting your 3 goals.
- We think that an additional field is a good idea.
- I think this area has some slopes to it already (down to the creek), so it makes sense to maintain the banks and build with them, rather than against them. I also like the idea of walking "deeper" into the park as this tends to push further away from the roads and can make me feel like I'm closer to nature.
- best chance for soccer fields, basketball courts, playground and picnic place
- Property funding, maintenance and amenities could be more readily funded without as much dependence on additional city revenue
- place for fields
- Best one
- playgrounds
- Big field
- It shows more trails than the square.
- Good plan
- best one
- Whichever one can allow for pickleball courts
- Something for everyone

- One can see far across the park, making it feel expansive. Can view more of the park offerings from alone spot.
- layout
- Sloping allows for geographical change, Scenic views
- Allows for more overall usable space
- I like the idea of supporting a large amount of recreation as well as making it seem extra friendly for families with young children
- Seems to be a good one.
- Don't know
- Like the option that has a dedicated field space. Great for impromptu games of soccer or ultimate Frisbee.
- Sports Field
- We need more synthetic turf fields and pickleball courts.
- Only one that includes sports field...but need more of them. Not just one.
- The only one that included what our city needs....sports field. However, one field is not enough.
- It's somehow the only one with a sports field.
- There is space created for a sports field.
- Sports field and multiple parking lots
- I thought it or the 10 acre square sight gave the most flexibility and accessibility.
- Like it
- Most inclusive to all walks of life (pun intended)
- Maintains the most existing trees.
- Tualatin desperately needs more outdoor sports options for kids. More basketball courts, baseball field options, more opportunities/locations to play
- not enough parking to have a large sports field on the 10 acre square site. Prefer some sloping for visual interest
- most stuff
- Because you can fit a baseball / soccer field complex
- More sports fields!!!
- Would like to see an example with a new concept. This looks like Jurgens. Take this opportunity to create something Tualatin does have. Add multiple soccer fields or a four plex baseball/softball area for youth. Adults have opportunities to play tennis and pickle ball at Jurgens. Please make our town competitive with the surrounding towns that put their youths needs first.
- Sports fields
- Great park design but not what we need.
- Just like it
- Best field
- I think they all are terrible. Tualatin needs more sports fields why not put some in the area
- This plan has the most things for family to do.
- We are in desperate need of additional sports fields for our youth. It is so important to give kids the opportunity to play different sports but that will never happen if there aren't enough fields to go around for the different sports. The spring is especially hard because there's softball, baseball, lacrosse and soccer all needing a place to practice/play and the grass fields are unusable until the end of March usually.

- The stuff in it.
- Sloping
- More sports field space.
- Has 1 sports field. However, we need to make more sports fields a priority.
- Please read what the majority of the comments focus on...youth sports.
- 1 of the 4 options actually has a sports field in it.
- Best for walking
- I don't like a steep slope so I picked the flat.

6. Once land has been acquired there will be a community planning process to select the elements for a future park. The community will chose items such as a playground, sport court, trails, picnic shelters, natural area, green space etc. Is there an element you feel should be added to the list?

- playground, trails, area for sports
- Sports complex
- I don't understand why there are less parking spaces for a 10 acre plot than a five acre plot?!?
- Skate park, basketball courts, fitness course
- As I mentioned before, "dedicated" pickleball courts.
- NO. Just Sports Fields! Every site plan I see here has a lack of parking and a lot of unused space. If you are adding a bunch of new people to the area shouldn't you proportionally add parks area?
- Large, multipurpose, and versatile sports fields with adequate parking are required to meet community needs. Provide night lighting if not located next to residential areas, otherwise don't. Wide pathways in parks link the facilities and are attractions in their own right by supporting walking and a safe place for children to ride bikes. And, as mentioned parks are a great place to integrate public art to enhance all the users experience.
- Water park. Something like the commons.
- No, you have an inclusive list already!
- Yes.
- skating and spray park
- more fields
- Skating area and spray park
- community gardens
- Easy bike accessibility
- Fitness course
- Dedicated pickleball courts please!
- Native plant garden, share plants. Water feature for children.
- soccer fields and skating
- Natural playground/play areas (as seen in several adjacent cities), refuge or wildlife habitat viewing area, area to acknowledge and teach about native land and original/rightful inhabitants
- This all sounds great, can't think of any additional elements currently.
- Sports courts and fields
- Playgrounds
- Things found at other parks.

- Things for kids and family's to do.
- Tennis and pickleball courts (set up for both, combined is good)
- Synthetic turf sports complex
- We need more synthetic turf fields and pickleball courts.
- Need more sports fields.
- More sports fields.
- A sports complex
- A sports complex. Not just 1 field.
- Splash pad, art features, and modern playground
- Splash pad
- BMX track
- Skating
- Chess area :)
- Wetlands/preserved natural areas.
- Splash pads for summer play
- covered picnic/rest area, safety lighting at night
- futsal courts
- Baseball and soccer turf fields. This can be used for softball, football, lacrosse, camps, and any outdoor fitness training.
- More sports fields!!!
- Turf baseball complex
- Baseball softball field
- Youth baseball/softball complex turf
Juniors/seniors field with soccer fields and tball fields in the outfield
Multiple soccer/football lacrosse fields
Multi use turf fields for recreation
Frisbee golf
- Love it
- More space for soccer fields.
- More soccer and sports fields. Kids are playing on poor park and school fields. City needs safe year round fields for kids.
- Baseball fields, soccer fields
- Bigger playgrounds, more basketball courts, a skating place and fountain and wading pool for kids.
- Yes, we desperately need a public (non school district) multi-use turf field with lights similar to Snyder Park in Sherwood and Hazelia Park in Lake Oswego. Additional futsal courts would be great as well.
- Vegetable gardens and butterfly garden.
- Trees
- No. Seems like what is at other parks.
- Sports complex!
- Sports complex!!
- A multi-use sports complex that would bring families and revenue to Tualatin.
- Thanks for listening

- Tualatin parks really need to step it up. Play structures need to be well thought out.
