Erin,

Me and my family are residents at Tualatin Village. My husband has owned his unit since 2011. We feel strongly that if the City approves the removal and replacement of the Sycamore trees surrounding the property, there should be no other choice than to do a gap analysis of what Oregon Native trees are lacking in Tualatin that once thrived here, and to replace those with only Native trees.

When the tornado touched down in Portland a few months back, the non-native trees were the ones to be fully uprooted, not the native ones.

The public should be informed about what replacement trees are being considered and why.

Thank you,

Cassie Cohen and Rodolfo Valentin
