Re: JAE

Dear Mel,

Thank you, for sending us the final site plans for this proposed development in Tualatin, OR.

My Company: Republic Services of Clackamas and Washington Counties has the franchise agreement to service this area with the City of Tualatin. We will provide complete commercial waste removal and recycling services as needed on a weekly basis for this location

The design location of the recycle enclosure sent 10/18/2019 repositioned at an angle will allow greater access for our trucks. The recycle enclosure design dimensions of 20' wide post to post ID and gate swing radius are adequate for our trucks to service the containers.

The existing enclosure for the trash box will allow access for our trucks to service the drop box

Thanks Mel, for your help and concerns for our services prior to this project being developed.

Sincerely,

Water supply modeling is necessary for larger projects to determine the impact of the project’s water demand on the water supply system. Water supply modeling will be performed by a consulting engineer based on the most recent version of the Tualatin Water System Master Plan.

Due to possible impacts to the water supply system, the following projects in Tualatin require hydraulic modeling based on the size and type of the project and projected water use for the finished project. The outcome of modeling could require offsite improvements to the water supply system in order to ensure that adequate water supply is available to serve the project and reduce impacts to the overall system.

Hydraulic modeling of the water supply system is required for the following project type/sizes/demand:

Project Type	Criteria	Permit Fee
Commercial or Industrial Building	Building floor area greater than 48,300 square feet or Anticipated daily water demand greater than 870 gallons per acre per day	\$ 300 per building
Residential development	More than 49 dwelling units	\$ 1,000
Multi-family development	More than 49 dwelling units or a combined building floor area greater than 48,300 square feet	\$ 300 per building

Please complete this form and submit the form and required fee (if applicable) with your land-use application (architectural review, subdivision, etc.).

Commercial or Industrial Development

- Building floor area 31,211 SF square feet
- Anticipated water demand (if known) _____ gallons per day
- Described planned building use STORAGE W/ OFFICE

Residential Development

- Number of dwelling units or single family home lots _____

Multi-Family Residential Development

- Number of dwelling units _____
- Building floor area (sum of all building) _____
- Number of multi-family buildings _____

Permit fee required based on the information provided above \$ 0.

- If no fee is required, enter \$0.

NOTE: Water Supply Modeling does not replace the requirement for fire hydrant flow testing. Flow testing of fire hydrants will still be required to verify adequate fire flow of finished system

Discussed Items:

Building/Fire:

- TVFR – Buildings over 50K sf require new Radio Control System –
 - Action Item: CIDA to contact Tom Mooney with TVFR for additional information and to confirm if this will apply to the new addition, and if so, what the extents of coverage would be.

Fees:

- Parks System Development Charge Rates change starting 7/1/2019
- Contact City for an estimate of permit fees for building prior to application

Property Line Adjustment Process:

- Type I review process for PLA – 1 week for review – 2 weeks for appeal
 - Action Item: CIDA to put together PLA submittal package.
- Once PLA is approved at City, we have 2 years to record with County
- Once PLA is approved at City, it will need to be submitted to Washington County for final approval. County process takes at least 2 months.
- Clean Water Services' service provider letter must be obtained for both PLA and addition. Should be one SPL that covers both.
 - CIDA to submit to CWS for SPL.

Engineering:

- CWS Code change for hydromodification – need to confirm current conditions meet code. Downstream analysis required.
 - CIDA to contact AAI (Civil Engineer) to get impact of this requirement.
- Transportation questions regarding trip caps need to be directed to traffic Engineer Mike McCarthy.
 - Action Item: Ben to reach out to Traffic Engineer for them to have discussions and provide required data to Mike McCarthy.
- No frontage improvements required along Leveton. Current dedication in place is more than adequate
- If Water Flow test is required or desired – contact Terence Leahy

Every effort has been made to accurately record this meeting. If any errors or omissions are noted, recipients are asked to please provide written response within five days of receipt.

Architectural Review:

- Architectural review application can be submitted prior to PLA being recorded; however, the process is cleaner if PLA recorded prior
- Land use will be a Type II review – require neighborhood meeting of 1000’ radius from site – based on plat location
- Design Standards based on Tualatin Development Code Chapter 73
- Waste provider letter from Republic Services required for AR submittal.
 - Action Item: CIDA to work with JAE to determine location for waste collection.
 - Action Item: CIDA to send approved location/configuration to Republic Services for their approval.
- Note that there will be 2 sets of conditions of approval—one from planning, one from engineering. Make sure both are addressed.
- Building review can be submitted 30 days after completeness of Architectural review
- Note that during permitting process, City Engineering does complete review prior to sending plans to CWS. CWS has 21 days for each round of review.
