Facsimile (503) 255-6147

To whom it may concern:

This letter is responding to the proposed building of a substation next to our haul road, which runs directly along the south perimeter of the lot in question. Our concerns are to highlight the dust generated from crushing operations, vibrations from blasting, as well as traffic using our entrance on SW 124th Avenue.

Our property consists of approximately 340+ acres and has been an operating quarry for at least the last fifty years. We always implement dust control during operations. We have a permanent record on file of all seismographs which are generated for all blasting events. We maintain a good sight distance for the entrance at SW 124th Avenue. Our haul road is in use by primarily heavy truck traffic six days a week, ten to twelve hours a day.

Please enter this letter as a permanent record for all concerned with operations at the proposed substation lot.

Thank you,

AJ Urbanek
