

The tip of a Sparkler burns at **1200° F**

That is . . .

- Hotter than Boiling Water (212° F)
- Hotter than Burning Wood (575° F)
- Hot Enough to Melt Glass (900° F)
- Hot Enough to Cause 3rd Degree Burns

FACTS:

- Each July Fourth, thousands of people, most often children and teens, are injured while using consumer fireworks. Even so-called 'safe' fireworks such as Sparklers.
- The risk of fireworks injury is two-and-a-half times as high for children ages 10-14 as for the general population.
