Flood Facts

We are already experiencing the first rains of the season which should remind all of us that flooding is one of the #1 threats facing our area. You need to be familiar with two important flood terms-

Flood Watch - Flooding is possible. Tune in to NOAA Weather Radio, commercial radio or television for information.

Flood Warning - Flooding is occurring or will occur soon; if advised to evacuate, do so immediately.

During flooding events sand and sandbags will be available at locations around the area. You can find these locations listed on the City's, County and Fire District websites.
